

Teyzix Core Internship (June Batch)

Task Title: AI-Powered Document Summarization System

Task ID: AI-INT-1

Domain: Artificial Intelligence / NLP

Difficulty Level: Intermediate

Assigned Date: 11 June 2026

Submission Deadline: 19 June 2026

Objective

Build an AI system that can automatically summarize long text documents into short, meaningful summaries while preserving key information.

Business Problem Statement

Organizations deal with large volumes of documents such as reports, emails, and articles. Manual summarization is time-consuming and inconsistent. TEYZIX CORE requires an AI-based solution that extracts key insights automatically.

Task Requirements

1. **Data Input System**
 - Accept input text from
 - Text file
 - PDF file (optional)
 - Direct user input
2. **Text Preprocessing**
 - Lowercasing
 - Stopword removal
 - Tokenization
 - Sentence segmentation
3. **Summarization Logic**
 - Implement extractive summarization
 - Use one or more approaches

- Frequency-based scoring
- TF-IDF based scoring
- Sentence ranking

4. **Output System**

- Generate short summary
- Show original vs summarized text
- Allow adjustable summary length

5. **Analytics Module**

- Word frequency analysis
- Most important keywords extraction
- Sentence importance scoring

6. **File Handling**

- Load documents from file system
- Export summary as .txt or .pdf

Technical Requirements

- Python must be used
- Use NLTK or spaCy
- Modular function-based design
- Clean and readable code
- Error handling required

Expected Deliverables

- Python source code
- Sample documents
- Generated summaries
- README file
- Execution screenshots

Evaluation Criteria

- NLP preprocessing 25%
- Summarization logic 25%
- Code structure 20%
- Output quality 15%
- Error handling 10%
- Documentation 5%

Bonus Challenge

- Abstractive summarization using Transformers
- Streamlit UI for live summarization
- Multi-document summarization
- Language detection support

Plagiarism Policy

Copying Fiverr clones, marketplace templates, or YouTube tutorial projects without meaningful customization will result in disqualification.
